WWI Aircraft

Frenchman Louis Bleriot was intrigued by the possibility of flight ever since seeing experimental flying machines at the 1900 Paris Exhibition.

The Aircraft of World War I

Pulling the green handle drops the red cam follower onto the propeller shaft cam wheel.

Aircraft of World War I, 1914

By the end of the war, faster long-range bombers were built that could carry a much larger weight of bombs.

Aircraft of World War I, 1914

Aircraft Design and Development This year we mark 100 years since the end of World War One. While new Allied fighters such as the , , and were coming into service, at this stage their numbers were small, and suffered from inferior firepower: all three were armed with just a single synchronised Vickers machine gun. Despite the belief—then and now—that this war was fought by individuals daring to fly for either side, aerial warfare was really one of attrition instead of victory.

World War I: Aviation and Aircraft of WWI

Fokker ultimately sold these items to the Danes, Dutch, and Soviets as observation and training aircraft.
