### Top 15 Future Technology Trends in 2020 (Updated)

He has published on a wide variety of topics including telecommunications, electronic markets, and data mining and numerous academic outlets such as Management Science, Operations Research, Decision Support Systems, and the INFORMS Journal on Computing. This is one of the most enigmatic new upcoming technologies that could impact businesses in 2020.

In assessing where quantum computing will have most utility, it's useful to consider four capital markets industry archetypes: sellers, buyers, matchmakers including trading platforms and brokers, and rule setters. The answers produced by quantum calculations are also different from their binary cousins.

### Past, present, and future of decision support technology

And so quantum computing came into its own. For instance, we have drones that directly communicate with the enterprise IoT platform and conduct peer-to-peer exchanges. Businesses are already and attain significant boosts to their click-through and conversion rates, attributable to greater relevance and less competition on voice search result pages.
