Diagnostic X

The scoring system shall include an evaluation for each attribute. The minimum spatial resolution at the center of the beam for a 6 inch field of view FOV is 2 line pairs per mm.

Quality and Safety in Radiology: A Symbiotic Relationship

The generator should be capable of maintaining the above linearity across all the available mA stations.

Web

Center the tube longitudinally and transversely, check that the x-ray tube is perpendicular to the cassette.

Performance Measurement

Table 1: Focal Spot Tolerance Limit Nominal Focal Spot Size mm Maximum Measured Dimensions Width mm Length mm 0.

How to Create a Quality Assurance Program for Radiation Safety in Interventional Radiology

Medical X-Rays are the manmade source of ionizing radiation that is responsible for the most significant amount of radiation exposure to the public, and reject analysis can help minimize this.

Quality and Safety In Radiology

Measured values of the focal spot length dimension parallel to the anode cathode axis and width dimension perpendicular to the anode cathode axis shall be within the tolerance limits specified in Table 1. Facilities must perform all the QC tests which the manufacturer supplied phantom will

allow.

Guide for Radiation Safety/Quality Assurance Programs: Computed Radiography

An application for approval of an alternative standard or for an amendment or extension of the alternative standard shall be submitted in an original and two copies to the Director, Division of Mammography Quality and Radiation Programs HFZ-240 , Center for Devices and Radiological Health, Food and Drug Administration, 1350 Piccard Dr. Harmonized policies and procedures and elements such as mission statement or job descriptions can provide clarity and consistency in the services provided, enhancing the outcome and representing a solid platform for quality improvement. At a minimum, this survey shall include the performance of tests to ensure that the facility meets the quality assurance requirements of the annual tests described in paragraphs e 5 and e 6 of this section and the weekly phantom image quality test described in paragraph e 2 of this section.
