To determine population size structure, mortality, recruitment and growth rates of *Puya hamata* rosettes, all *Puya* plants in 400 m² plots were surveyed in 2008 and again one year later.

PUYA HAMATA DEMOGRAPHY AS AN INDICATOR OF RECENT FIRE HISTORY IN THE PÁRAMO OF EL ÁNGEL AND VOLCÁN CHILES, ECUADOR

Burning and Grazing in the Paramo of Los Nevados National Park, Colombia. Accessed 13 th June 2012. Aunque la influencia volcánica del Chiles podría tener incidencia directa sobre la físicoquímica del agua de las lagunas Verdes, su actividad está catalogada como un volcán potencialmente activo, de baja repercusión, por el momento , condición que sugiere que no necesariamente la influencia volcánica es la causa principal para el cambio en la estructura y composición florística de las especies de plantas acuáticas de las Lagunas Verdes.

PUYA HAMATA DEMOGRAPHY AS AN INDICATOR OF RECENT FIRE HISTORY IN THE PÁRAMO OF EL ÁNGEL AND VOLCÁN CHILES, ECUADOR

Economic Botany 49 3 : 269—274. Colombia, Sus Gentes y Regiones 9: 19-29.

Altitudinal analysis of carbon stocks in the Antisana páramo , Ecuadorian Andes

Pre-Columbian man in Costa Rica. Sukhumaabhorn Kaewsangsai dye plants in Chiang Mai; completed 2022; co-supervisor Chiang Mai University 39. Diversidad y frecuencia de las familias, géneros y especies de plantas vasculares en los transectos del Parque Natural Los Nevados-TPN.
