4 Fascinating Underwater Archaeological Sites

Evans just got back last week from a six-day in the Gulf of Mexico, where 40 million acres of land that was dry 12,000 years ago is now underwater.

Massive Bronze

Flemming adds that this study marks the first time any marine sites older than 5,000 years have been found in the tropics.

Archaeologists Uncover 9,000

Importance and Contributions Underwater archeology has significantly contributed to the expansion of research and knowledge of the past. The Severn Estuary, West Country 12,000 years old Surveying in the Severn Estuary at low tide. Underwater Sculpture Park, Grenada- A secret life under water Beautiful sculptures line the bottom of the Caribbean Sea off the western coast of Grenada and is called the Molinere Underwater Sculpture Park.

'World's most important underwater archaeological site' under threat from pollution

The Archaeology of Europe's Drowned Landscapes

Despite its potential international importance no work has been carried out at the site since it was first mapped in 1968 and Dr Henderson has had to get special permission from the Greek government to examine the submerged town. But sculptures have also been erected built to honor lost souls, or to serve as a place of pilgrimage for those devoted to their religion. Most remains were found either in or near to a dwelling, which may indicate the people practiced some form of ancestor worship.

7 Most Fascinating Underwater Ruins

Although Mycenaean power was largely based on their control of the sea, little is known about the workings of the harbour towns of the period as archaeology to date has focused on the better known inland palaces and citadels.
