Georgii Biushgens

Нежеланието на Хитлер да създаде независима Украйна, жестокостите и грабежите, както и интернирането на лидерите на украинския фронт за независимост променят отношенията на украинците. But although Dobrotvorskii had left the laboratory he was unable to break with aviation.

A program package for solving problems of FV structure design

There was an outstanding flight by Rudnev over the center of Petersburg in which the aircraft twice circled round the cupola of St.

Sensitivity of a bomb to wind turbulence

MacMillan Company, New York, 1962. Raschet amortizatsii shassi teleskopicheskogo tipa: Trudy TsAGI, Moscow, BNII TsAGI, 1967, no. The handling characteristics of a naval vessel affect its maneuverability.

Dinamika

Pashutin made an extremely important contribution to the theory of oxygen starvation when he produced the second Russian classification of the 16 various forms of anoxia state. In retirement his health deteriorated still further and in 1947 he died at the age of 54.

Sensitivity of a bomb to wind turbulence

They are used in the practice of medicine. The history of ballooning and flight in Russia.

Detail předmětu

Another portion is to accomplish the algorithm for vertical take-off and landing of YTU-VTOL-V1 aircraft system. This applied in particular to the extremely long paper by Hild United Kingdom which touched on almost all the main questions in aviation medicine but in which, in relation to selection, the rapporteur merely insisted on the extension of clinical methods which should be augmented by research on the coordination of

movements with a Reade apparatus and the introduction of Tucker's apparatus to study acuity of hearing. Nedovoljno iskustvo navelo je Grke na mišljenje da gibanje nekog tijela traje samo tako dugo dok na tijelo djeluje.

Computationally effective mathematical model of airplane flight

He criticized the methods of foreign psychologists and psychophysicists, which he thought were naive, crude and inadequately developed. Bulldozers are used when clearing cross-country routes in moderately difficult terrain, in brush, and in thickets of low or half-grown trees, clearing snow from cross-country routes, levelling sites, building roads on hillsides, grading river banks, filling in ditches, craters, sand pits, felling trees, and clearing tree stumps. Pashutin's interest in oxygen starvation gave rise to a number of experimental works on various aspects of the effect of hypoxia.
