CDC

Equally important, as brought out in the case studies, is identifying how the policy or project may affect populations other than those targeted.

**Health Impact Assessment (HIA) in Ireland and the role of local government**

A histone mutant reproduces the phenotype caused by loss of histone-modifying factor Polycomb.

SciELO

In the United States, HIA is a rapidly emerging practice among local, state, and federal jurisdictions. Regulation of neonatal and adult mammalian heart regeneration by the miR-15 family.

**Making an impact: How housing associations can measure their effect on people's health, Housing, Care and Support**

Functional convergence of signalling by GPI-anchored and anchorless forms of a salamander protein implicated in limb regeneration.

**Making an impact: How housing associations can measure their effect on people's health, Housing, Care and Support**

Methods for prospective health impact assessment of public sector policy.

**Health Impact Assessment (HIA) in Ireland and the role of local government**

This work shows that Polycomb activity can be pro-regenerative by promoting dedifferentiation through silencing sarcomeric genes in muscle. Health impact assessment HIA is a tool that can help communities, decision makers, and practitioners make choices that improve public health through community design.

## **Making an impact: How housing associations can measure their effect on people's health, Housing, Care and Support**

Regulation of primary response genes. The focus on equity represents a new approach to the evaluation of social, environmental, and economic policies, programs, and projects. J Publ Health Med 2000; 22:268-274.
