Political stability and economic development are deeply interconnected

Sustainable Development under Competing Claims on Land: Three Pathways between Land Use Changes, Ecosystem Services and Human Well-Being. It has become increasingly evident that the government, by itself, will not be able to build the infrastructure. Focusing on this interaction between powerful actors such as governments and development organizations is important for better understanding the lived realities of the people who face and live with the different development challenges on a daily basis.

Politics and Development in Tanzania: Shifting the Status Quo

Oil exports to China have increased sevenfold since 2002 twice the growth rate of Angolan oil exports to the United States over the same period.

Global Issues Overview

For instance, the attention to the violence in Rakhine State in 2017 seems to have led to a decrease in funding initiatives supporting the NLD, thus indirectly affecting the power balance between political actors and potentially the long-term political development Décobert and Wells , in this special issue.
