## Primary care groups: Tackling organisational change in the new NHS

Also notable is recognition of the ward sister role, holders of which it is argued deserve extra remuneration. We have been meeting for the past eight weeks. Commissioning The government proposed reducing the number of commissioning bodies from 3,600 to 500.

## Leading the switch to patient

November 1962 - First UK hip replacement Professor John Charnley carried out the first full hip replacement on the NHS at Wrightington Hospital in Wigan.

## NHS reform timeline

The most common reasons given for planning to merge were to increase management capacity or to achieve economies of scale in management; these were mentioned by 48% of those planning mergers. Altogether, 13% of all primary care groups and trusts in our sample will care for populations of more than 300 000. You or your colleagues may wish to air these views.

## Leading the switch to patient

The PCGs would be accountable to health authorities HAs , but eventually PCGs would become independent primary care trusts. The previous government, however, actively promoted an expansion of private provision of hospital and community services, with the aim of creating a mixed economy in which any willing — and licensed — provider could offer services to NHS patients. National Framework for Assessing Performance Value for money is important.

## New NHS: Modern, dependable

There is also evidence to suggest improvement in the collaboration of practice and community nurses, with initiatives such as joint training and the sharing of information.

## **70 defining moments in 70 years of the NHS**

New health and wellbeing boards are established. Their publications include Health Technical Memorandums, Health Building Notes, design guides, circulars and Health Facilities Notes.
