Smoking Cessation: Tasks for the Practice Facilitator

Whilst relapse prevention was largely seen as support to prevent abstinent smokers from relapsing to smoking, some interviewees stated that RPIs were being delivered to lapsed or relapsed smokers. Shiffman S, Hickcox M, Paty JA, Gnys M, Kassel JD, Richards TJ: Progression from smoking lapse to relapse: Prediction from abstinence violation effects, nicotine dependence and lapse characteristics. Who can call the Georgia Tobacco Quit Line? Quit coaches improve the chances of quitting by 50%.

Smoking Cessation: Tasks for the Practice Facilitator

. Twenty-five percent of all Denver residents, or approximately 150,000 individuals, receive their health care at Denver Health, including one in three children in Denver who are cared for by Denver Health physicians Denver Health, 2015c.

Relapse prevention in UK Stop Smoking Services: a qualitative study of health professionals' views and beliefs

Health professionals described this as an 'open door' policy, with relapsed clients always free to return to the service and re-join support groups. Response Of the 23 individuals who had indicated their willingness to participate in the study, four could not be contacted and three potential participants indicated that they no longer wished to participate, so a total of 16 interviews were conducted 12 with females.

The prevention paradox

The interview schedule 1 What interventions are currently being used by your service to help smokers who wish to stop smoking? Reassess the person shortly before the prescription ends.
