## Financial Institutions and Markets

Types of Risks Incurred by Financial Institutions 20.

## Financial market and institutions

Financial intermediation is a productive activity in which an institutional unit incurs liabilities on its own account for the purpose of acquiring financial assets by engaging in financial transactions on the market; the role of financial intermediaries is to channel funds from lenders to borrowers by intermediating. Chapter quizzes are available as a resource to assist the students in understanding how questions may be framed in the actual midterm exams.
