## **Environmental Impact Assessment (EIA)**

London: Institute for European Environmental Policy The Hague; 1996.

Ecological footprint of European countries — European Environment Agency

Percentages for the social-science literature were calculated for each systematic review blue data points and then averaged across all 32 systematic reviews blue bars and black vertical lines represent mean and 95% Confidence Intervals, respectively. Here, we empirically quantify, on a large scale, the prevalence of different study designs and the magnitude of bias in their estimates. Geochemical distribution and environmental risk assessment of heavy metals in groundwater of an industrial area and its surroundings, Haridwar, India.

## **Environmental impact assessment improvement project**

## **Ecological compensation and Environmental Impact Assessment in Spain**

Of the observational designs, the BA design performed very poorly both when analysing randomised and non-randomised data as expected, being uncontrolled and therefore prone to severe design bias. We presented and tested an approach with the aim to develop a more systems-based way of understanding long-term social-ecological temporal dynamics at the national level.
