The Programme is widely regarded as one of the best community-based programmes in the world. New standardised evaluation tools should distinguish between the different benefits and costs experienced by different health professionals with different levels of experience in different links, thus allowing appropriately targeted future funding and personal support. Additional file : Appendix 6 categorises these individual benefits as knowledge, attitudes and skills.

### CDC

These benefits to individuals were assigned to seven domains, six of which were skills-based: clinical skills, management skills, communication and teamwork, patient experience and dignity, policy, academic skills, and the last of which related to personal satisfaction and interest, as shown below in Table.

### CDC

Investment: increasing sustainable and poverty-reducing investment in FCDO priority countries, through improving the quality of Chinese outward investment in developing countries.

### Global health research

Yogendra S: Poor countries still provide reasons to train doctors in diseases of poverty.

### Do health partnerships with organisations in lower income countries benefit the UK partner? A review of the literature

Of 227 articles retained through initial screening, 65 were included in the final analysis. Despite these limitations our analysis suggests that there is a strong theoretical argument that the skills acquired through volunteering are transferable to service delivery within the NHS and that the benefits to

individuals and institutions could be maximised when volunteering is formally embedded within continuing professional development processes. Vaz F, Bergström S, Vaz ML, Langa J, Bugalho A: Training medical assistants for surgery.

### **Nongovernmental Organizations (NGOs) Working in Global Health Research**

Disagreement was resolved by consensus. Relevant articles and their bibliographies generated new leads, which were also evaluated for inclusion. Stories that anchor developing country successes can offer preliminary insights on international cooperation, including through various partnerships, collaborations, and exchanges.

### **Developed**

Since its establishment in 2007 the Division of Tropical and International Health: Global health partnerships: the UK contribution to health in developing countries - the Government response.
