Hodgkin's Disease: Symptoms, Diagnosis, and Treatment

Make sure to tell them about any concerns you may have about long-term side effects and what you can do to help reduce your risk.

What's the difference between Hodgkin and non

There are often ways to relieve these symptoms. The information gathered from the staging process determines the stage of the disease.

What's the difference between Hodgkin and non

Start and spread of Hodgkin lymphoma Lymph tissue is in many parts of your body, so Hodgkin lymphoma can start almost anywhere.

Hodgkin's lymphoma (Hodgkin's disease)

These cells are usually an abnormal type of B lymphocyte. Lymphangiograms or laparotomies are very rarely performed, having been supplanted by improvements in imaging with the CT scan and PET scan. He has several underway investigating ways to counter side effects, specifically for patients on immunotherapy.

Hodgkin's lymphoma (Hodgkin's disease)

When a pregnant woman is treated with chemotherapy for Hodgkin lymphoma, it isn't possible to protect the unborn baby from being exposed to the chemotherapy. If radiation is given to areas in the chest, the gland may be affected.

Hodgkin's lymphoma (Hodgkin's disease)

Signs of adult Hodgkin lymphoma include swollen lymph nodes, fever, drenching night sweats, and weight loss.
