### The World Historical Implications of the Great Russian Revolution

This includes behaviors such as hacking, manipulating algorithms, compromising privacy and confidentiality, or stealing identities. The Sun will die in about 4 to 5 billion years, swelling until it gobbles up and destroys the Earth.

### Why the Industrial Revolution didn't happen in China

LIDAR systems combine light and radar instruments. AI is expected to be better equipped than humans to write a high school essay by 2026, drive a truck by 2027, work in retail by 2031, write a best-selling book by 2049, and perform surgery by 2053.

### Big History Project: The Future

The lower middle class in Western and Asian industrialized societies today has a higher living standard than the pope and the emperors of a few centuries back, in every dimension. We will see if it is sustained — public opinion in the U.

### How artificial intelligence is transforming the world

Decisions about capital investment and growth are made in a world context and on a global scale.

### Why the Industrial Revolution didn't happen in China

The only country to successfully enter the Western world on its own terms was — and indeed was soon carving out an empire of its own.

### Why the Industrial Revolution didn't happen in China

Decisive awareness We are becoming increasingly aware that the decisions made in the recent past, and those made in the near future, will determine the direction of life on our planet.
