Následkem je zvýšené riziko onemocnění srdce, ledvin nebo mozkové prí~ Nejvyšší tlak je ve velkých tepnách poblíž srdce, které zabezpečuje oběh krve v našem tele a vytváří krevní tlak. More platforms had been built, and there was now a suite of rooms for the royal family and other special passengers. Paradoxně velmi známé, dobře zpracované a prozkoumané má na vrchu v katastru obce Točná nejméně jasnou část, která dosud vyvolává řadu otázek.

Potůček má vícero prameniště, většina se nachází na východní straně údolí, v místě zvaném V Olšičkách, podle olší rostoucích ve výběžku lesa, který se táhne až k ulici Branišovská a navazující K Točné, které spojují obě uvedené obce. The four lodges with the arch in the centre were undoubtedly an impressive sight, though many thought these buildings simple and naive and with no real purpose, just a clumsy attempt to make a statement.
