**Clear new photo of 'Loch Ness monster' goes viral**

This is still from the video: 3 August 2019 - Sean T, on holiday from Kent took a number of pictures of the loch while in the area with his family. The Loch Ness is along the , and this could be a description of an earthquake.

**Sightings of the Loch Ness monster**

Fortean Pictures Library One reason the photograph had such an impact on the Loch Ness legend was that it came from such a credible source. Prothero, a , walked me through all the reasons the Loch Ness Monster couldn't possibly exist. In any case, the matter has faded a little in recent years.

**Sightings of the Loch Ness monster**

It has been claimed that sightings of the monster increased after a road was built along the loch in early 1933, bringing workers and tourists to the formerly isolated area. Both onlookers confessed that there was something uncanny about the whole thing, for they realised that here was no ordinary denizen of the depths, because, apart from its enormous size, the beast, in taking the final plunge, sent out waves that were big enough to have been caused by a passing steamer.

**Loch Ness Monster 'caught on sonar' as 30ft shape detected 500ft below surface in 'most compelling evidence yet'**

Could the suggestive sonar traces be the result of human error? The Loch Ness Mystery Solved.

**Loch Ness Monster hunters spot strange presence in the Scottish loch**

Loch Ness has resident , and photos of them and deer swimming in the loch, which were cited by author Ronald Binns may have been misinterpreted. He reported that there was some boat traffic up to 5 minutes before sighting took place but the loch was calm at the time.

**The Official Loch Ness Monster Sightings**

Once again, it is a possibility but it remains unlikely.

### **The Legend of Nessie the Ultimate Loch Ness Monster Site**

Lehn showed that atmospheric could distort the shape and size of objects and animals, and later published a photograph of a rock on that resembled a head and neck.
