Canadian Radio

A focus on users Central to all our recommendations is a desire to better position users of communications services — whether that be individual consumers, not-for-profit institutions or private sector organizations. The study presents detailed information about the important growth factors, restraints, and key trends that are creating the landscape for the future growth of the telecommunication market, to identify the opportunistic avenues of the business potential for stakeholders.

Canada's communications future: Time to act

Number portability does not currently apply in respect of mobile telephony services mobile number portability or MNP but may apply in the future.

2019 SCC 66 (CanLII)

Broadcasting Regulatory Policy CRTC 2013-372, August 8, 2013 online , at para. We are recommending improved funding for public interest participation and the creation of a Public Interest Committee, funded by the CRTC and composed of not more than 25 individuals with a wide range of backgrounds, skills and experience. MTS Allstream noted that some of the responses indicated that there was no satellite service coverage in Manitoba, and other responses indicated that satellite operators were only interested in selling the entire capacity of a satellite to a single customer.

Canadian Radio

By Abella and Karakatsanis JJ. Also, Telesat is the only satellite operator that has been required to provide free transponder space to select providers of telecommunications services in the North.

Canadian Radio

Pratik is the lead quantitative analyst almost for the all categories research report like Chemicals and Materials, Medical Devices, Consumer

Goods, Food and Beverages, Telecommunications and Wireless, Energy etc. Our recommendations throughout this chapter reflect the ongoing importance of competition in achieving Canadian telecommunications policy objectives. Exceptions to this limitation permit the CRTC to disclose designated information where it determines that disclosure is in the public interest.
