Here, we describe a case of salmonella osteomyelitis of the right 6th rib in a 74-year-old woman who presented with breast pain, swelling, high

fever and local heat. Copyright: © Hashimoto et al. A computed tomography CT scan at the first visit to another hospital showed a mass in the chest that invaded the ribs.

### **Salmonella Osteomyelitis of the Rib Mimicking a Mammary Tumor: A Case Report**

These findings suggest that, younger adolescents and young adults with high-grade or trunk-located sarcomas require more aggressive treatment. He was a young and determined dreamer who decided to leave for America in search of new opportunities. Keywords: elderly woman; mammary tumor; osteomyelitis; rib; salmonella.
