## Disturbance of Copper Homeostasis Is a Mechanism for Homocysteine

A clear understanding of how these minerals contribute to cardiovascular function will provide a rationale for making dietary recommendations that improve the health of the general public.

## Correlation of Clinical Response With Homocysteine Reduction During Therapy With Reduced B Vitamins in Patients With MDD Who Are Positive for MTHFR C677T or A1298C Polymorphism: A Randomized, Double

Disrupting Mitochondrial Copper Distribution Inhibits Leukemic Stem Cell Self-Renewal.

## Blood Levels of Homocysteine and Increased Risks of Cardiovascular Disease: Causal or Casual?

Also, real time RT-PCR assays are currently being developed to study message of enzymes involved with homocysteine metabolism.

## Effect of dietary homocysteine on copper status in rats

Translation: statin drugs have a null effect on mortality.

## Correlation of Clinical Response With Homocysteine Reduction During Therapy With Reduced B Vitamins in Patients With MDD Who Are Positive for MTHFR C677T or A1298C Polymorphism: A Randomized, Double

Results: 159 of 170 vitamin-treated patients and 123 of 160 placebo-treated patients were completers. Scientists at the Grand Forks Human Nutrition Research Center in conjunction with scientists at the University of Wyoming and the University of North Dakota, sought to determine whether an IGF-I mechanism could be implicated in the pathology of copper-deficient hearts.
