### Process for Designing a Curriculum Program

Strengthening the prominence of digital technology in GTCS standards will see a change in the delivery of initial teacher education and in the take up of career-long professional learning CLPL opportunities related to the use of digital technology. About 62 percent of students spend half or more of their instructional time in general education; this varies considerably by disability.

### Process for Designing a Curriculum Program

Through this, students are able to master the desired competencies by revisiting the subject several times and relating new knowledge or skills with the previous one. There also has been considerable research during the past decade about strategies for improving the employment potential of students with disabilities.

### Process for Designing a Curriculum Program

Of the 35 states responding that any of their standards will apply to students with disabilities, only 30 specified which would apply to students with severe disabilities.

### Curriculum Design: Definition, Purpose and Types

Abstract Many teachers may well have very good ideas on how they would wish to see the curriculum changed and developed to meet the needs of a rapidly expanding technocracy. The process described here of refining the curriculum framework may seem overwhelming.

### Enhancing learning and teaching through the use of digital technology

In an exploratory application, the student is free to roam through the application and search for information. It encompasses the macro or broadly based activities that impact on a wide range of programs, courses, and student experiences.

#### **4 CONTENT STANDARDS, CURRICULUM, AND INSTRUCTION**

Employers in the community are, likewise, obligated to indicate what their needs are and to assist the school in meeting these needs.
