Cinder Track

. He's demoted merely for wanting to be near his wife during her dangerous labour. .

The Cinder Path (film)

It was largely faithful to the source material, only removing a few minor characters and situations such as Charlie's encounter with a scrap merchant who gave him a lift, and adding extra scenes between Charlie and Nellie during their relationship such as a last minute farewell at the train station before he is deployed and a final confrontation between Charlie and Victoria, who is absent from the last third of the novel. When his old enemy taunts him for buying a commission with his wife's whoredom, Charlie shoots him dead in a rage, but since Slater's rifle was moving towards him at the time, it is ruled self-defence, Slater's family are told he died bravely in battle and Charlie is commended for getting the rest of the men back safely.

Cinder

In the days before Remembrance Day, where we focus on the horror of spilled blood, and sacrifice on the battle field, it was good to be reminded that behind all of these stories were the people up and down the country just getting on with their lives.

Cinder

Slater, the only other witness to MacFell's death, uses the knowledge to put pressure on Charlie and Arthur and ultimately blackmails Polly into marrying him. One-third of a mile in length, spanning four blocks, the path extends from South Taylor Road to Canterbury Road.
