CHAPTER 4 THE NATURE OF DIFFERENTIAL EQUATIONS 1. If nature were not beautiful, nature were not worth knowing, if because he delights it it would would not be worth life do not here speak of that beauty that strikes the senses, the beauty of and appearances; not nothing to do with science; I from that I undervalue such beauty, Jar mean that if, but it has profounder beauty which comes from the har- monious order of the parts, and which a pure intelligence can grasp.

It is NOT a REVISION of ANYTHING. Radiocarbon is produced in the upper atmosphere by the action of cosmic ray neutrons on nitrogen. The knowledge of advanced calculus, Fourier series and some understanding about ordinary differential equations, finite differences as well as special functions are the prerequisites for the book.
