Longitudinal Data Analysis for the Behavioral Sciences Using R

The book then has sections on reminders and problems to guide the reader. This is - far and away - the best textbook I've come across for an introductory level course. Papers turned in the minute after the due date count as one day late.

Introductory Statistics for the Behavioral Sciences

There will be a 2-3 page longer for students enrolled for graduate credit final project due at the end of the semester. This books has very powerful pedagogical tools for a complex topic.
