50 years of Computational Wind Engineering: Past, present and future

At a recent trade show, we showcased CAD viewing and sketching tools on the Microsoft Surface computer. In 1943, IBM chairman Thomas Watson said there might be a total world market âfor maybe five computers. It's safe to say that engineers look at the world a little differently than most other people.

The 50 Greatest Breakthroughs Since the Wheel

The money is good but meetings and all the corporate drama — not so much. This group includes the 1 and also , 6 and now of course , 9 the , 16 and the underlying technology for the modern data age, 4 , plus 29. However, when I applied the concepts from FI and progressed in the field I became more valuable to my employers.

TD2 Celebrates 50 Years of Engineering

But, we also may be reaching our limit given our current methods and capabilities.

50 Years Of Gas And Propane Testing

GE Aviation used to Google. They just wish to use you up and spit you out. Yes, I know that these are toys designed primarily to teach young children dexterity and hand-eye coordination.
