DTL Standards

Video: Digcit insights From Educators Discover how to take digital citizenship beyond monitoring and into mentoring with tips from educator Michael Hernandez and mother-and-son digital citizenship duo Marialice Curran and Curran Dee.

DTL Standards

These sessions were well attended and provided district teams with a robust overview of the Digital Learning Competencies as well as an opportunity to begin the planning process for implementation in July 2017.

Digital Citizenship in Education

School and district administrators should use these competencies to improve their practice, build capacity in their staff, and drive student learning within their schools. Administrators should model the behavior they expect from their staff and students and should continually seek to represent their schools and districts with the way they convey themselves both on and offline. The standards are designed to be delivered by classroom teachers in all curricular areas and grade levels.

Digital Citizenship in Education

.

Digital Citizenship in Education

Digital citizenship goes beyond conversations about personal responsibility. The State Board of Education approved the competencies on June 2016.
