Micropalaeontology of oceans

An ISSN consists of eight digits in two groups of four, separated by a hyphen. The classification numbers applied to books and other materials are used to arrange items on shelves and to support browsing, filtering and retrieval of bibliographic information in online systems. Each ISBN is a 10 or 13 digit number.

OCLC Classify

To learn more about FAST, please visit the on OCLC. Thirteen-digit ISBNs must begin with either 978 or 979.

OCLC Classify

The Classify prototype is designed to help users apply classification numbers. Enter an OCLC number without leading zeros.

Micropalaeontology of oceans

Hyphens or spaces usually separate the elements of the number on the item. Classify provides a user interface and a machine service for assigning classification numbers and subject headings. The Classify prototype helps librarians apply classification numbers to resources in library collections.
